ShowWork

Practise a task.
Show what you can do.

Short retail tasks, feedback and a work sample you choose to share.

Youth employment and work readiness
FNB AOTY Hackathon 2026

The problem: showing ability without a job history

47.4%

Youth unemployment, ages 15–34
South Africa · Q2 2026

Our narrower hypothesis

A first-time applicant can practise a real workplace decision and show the response to a reviewer.

A CV claim such as “good with customers” gives less context than the actual work.

Work samples cannot solve a shortage of jobs. Employer usefulness still needs testing.

Source: Statistics South Africa, QLFS Q2 2026

One applicant’s journey

Zanele is a fictional first-time retail applicant.

1	**Read**	Check the receipt, bank entries and store policy.
2	**Write**	Explain what you would say and do next.
3	**Improve**	Use feedback to revise. Keep the first attempt.
4	**Share**	Let a person read the task and both responses.

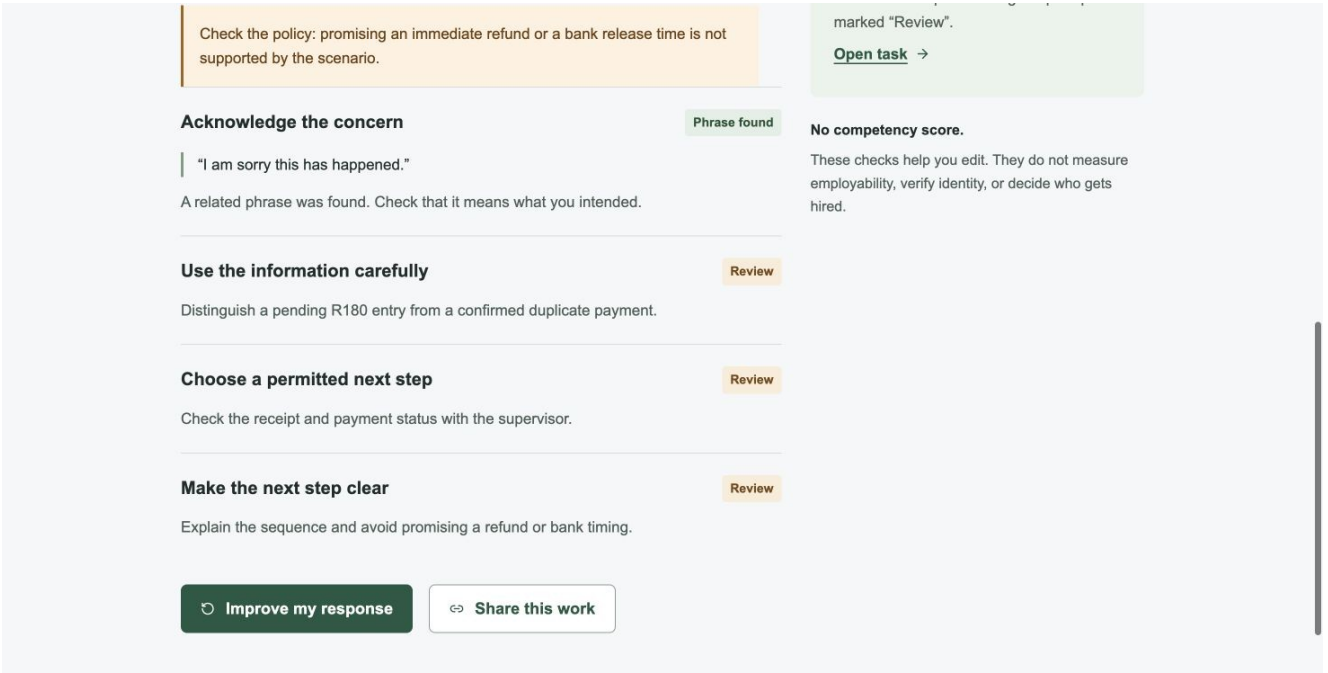

Feedback tied to the response

First attempt

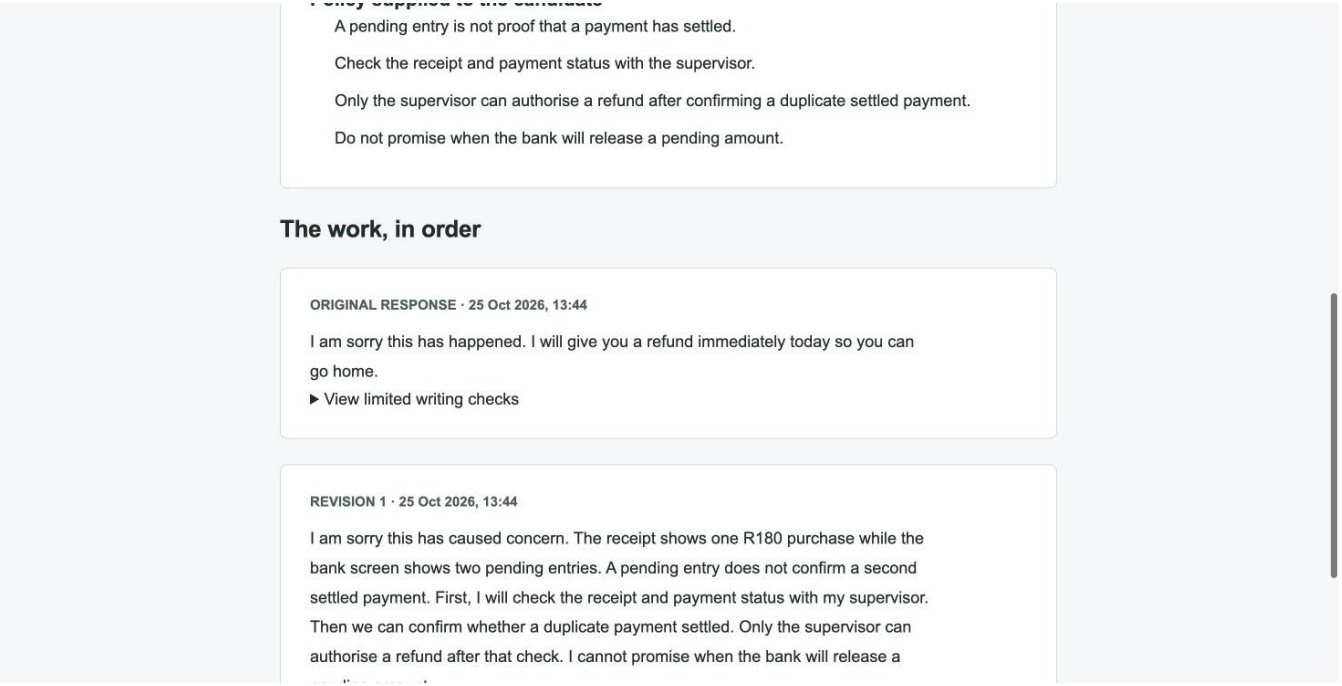

“I will give you a refund immediately today…”

The app flags the promise, then points to the receipt, pending status and supervisor check.

Rules today. Optional AI adapter included, disabled and mock-tested only.

A work sample with its context

What the reviewer sees

The situation and store policy

The original and revised response

Writing checks with their limits

The user chooses when to share. A link is a snapshot and can be revoked.

Existing options and our focus

Option	Main offering	ShowWork’s proposed role
Forage	Free, self-paced job simulations	A shorter retail task and response history
SA Youth / Harambee	Work opportunities and matching	A work sample to accompany an application
TestGorilla	Skills tests and hiring assessments	Practice and sharing controlled by the user

The niche is a design choice, not a proven market gap or an exclusive feature.

Forage SA Youth / Harambee TestGorilla

Business model to test

Free for applicants

Practice, saved responses and share links remain free in the proposed model.

First potential payer

Youth training providers, with a proposed R1,500/month cohort package. Cohort tools are future work.

Pilot targets

50 candidates · 5 reviewers
Measure completion, useful feedback and reviewer interest.

Financial assumptions

R2,000/month operating allowance. Two provider subscriptions would cover it before founder pay, tax and acquisition.

Architecture and safeguards

Browser

React / Vinext
Read → Write → Review

→

Server routes

Cloudflare Worker
Checks and share controls

→

Database

Cloudflare D1
Sessions, responses, links

Private session

Random HttpOnly cookie
7-day expiry
Ownership checks

Controlled sharing

One task per snapshot
Revocable links
No later revisions added

Verified checks

11 unit / mock tests
13 API checks, local + live
Public browser journey

Optional model transport is isolated and disabled. No live model service is called.

Try ShowWork

Open the app

Start this task → I’m ready to write → Save and get feedback

No login needed. Use made-up information only. Each browser has its own saved work.
